

compri- asd – non slip mat

Impact sound insulation made of special elastomer/PE foam composite.

The advantages and properties:

- High load-bearing capacity due to extreme compressive strength.
- Environmentally friendly (made from recycled rubber powder and recyclable).
- Can be used in a wide range of temperatures.
- Unrottable.
- Non-slip.
- Perfect resilience (flexible copolyester).

Product name: Compri- asd-non slip mat

Classification: Classified rubber powder from recycled car and truck tires.
Grain size up to - 0.8 mm.

Production process: The raw material is an ambient fine rubber powder in the grain size 0.0 - 0.8mm. In combination with a copolyester adhesive (EMS) -without plasticizer - the two fractions are mixed and heatet, pressed and cooled using a special process.

Technical data:

Description: Results compri - asd -non-slip mat
Strength: 2.0 mm - 10 mm
Density: ~ 1000 kg/m³
Temperature resistance : - 40 ° C to + 130 ° C
Delivery form: Pads / plates / rolls
Dimensions: on customer request
Coefficient of static friction: 0.89 μ
