

Compriband-RSD

External venetian blind box insulation.
Available immediately in many widths and heights.

Product information

Very soft Compriband, tested to BG1 for the corresponding joints, for use as insulation in external venetian blind boxes or roller shutters. The rolls are manufactured according to the standard list, special widths are produced without delay. Thanks to the very strong adhesive, this special insulation can be applied without any problems even in difficult conditions.

Areas of Application

Insulation for external roller shutters, external venetian blinds and venetian blind boxes.

Technical Data*

Basis of foam	Polyurethane cellular foam	
Basis of impregnation	Special acrylate with flame retardant	
Properties	Classification	DIN
Service Temperature	- 30 °C to + 80 °C	DIN 18542:2020
Compatibility with Conventional Construction Materials	Requirements met	DIN 18542:2020
Exposure Class	B1 (flame retardant)	DIN 4102
Sd-Value	< 0.5	DIN EN ISO 12572
Storing Period	1 year at room temperature 1 °C to 20 °C, dry.	

Product Benefits*

- High cost advantage due to time savings during installation:
 - One sealing tape is sufficient as insulation.
 - No further work processes.
- Simple and secure insulation during installation in just one work step.
- Extremely long service life.
- Weather-independent installation.
- Very soft and supple.

* The properties and characteristics are depending on the compression of the tape.

Colour

- Black.

Delivery form

- Pre-compressed rolls.

Compriband-RSD

External venetian blind box insulation.

Available immediately in many widths and heights.
